

# Georgia Fullard

Freelance Photographer

## Personal Bio

I am an enthusiastic, energetic, hardworking person who is completely focused on capturing the perfect shot within any brief. I enjoy experimenting with setup design, lighting and use of props to achieve my desired image.

I like to take on challenges that push my creative mind as well as my technical skills to further expand my knowledge inside and out of the studio. Having my own studio space allows me the freedom to get as creative as possible whenever necessary.

Reading

## Experience

In the past 7 nearly 8 years I have dabbled in many different areas of photography taking on a range of clients. This meant I had to push out of my comfort zone and take myself out of the studio to complete some briefs, making myself work with natural light instead of artificial light, shadows and extreme weather changes. I have photographed things such as: portraits of children/adults/families in the studio, products for companies, event photography i.e parties, weddings etc, sport photography such as dressage, show-jump and cross country as well as pushing out to automotive photography, on and off the track.

## Skills

Adobe Photoshop

Adobe Illustrator

Adobe Indesign
